

TVA OIG Approved Use Case Inventory

AI Governance Review 8/13/26 – Approved 8/13/26

Use Case Name	Description	Approved Date
Writer / Editor	This is a general use case that involves uploading draft or raw information and AI either creates new documents (e.g., executive summaries) or suggests improvements to draft documents (e.g., policies, work papers, draft reports). Humans conduct final review of AI work. This use case saves time and improves writing quality.	8/13/26
Summarizer	This is a general use case that involves uploading and summarizing documents to identify themes, information highlights, or key findings. Humans conduct final review of AI work. This use case saves review time.	8/13/26
Analyzer	This is a general use case that involves analyzing data within a file or across multiple files. Humans conduct final review of AI work. This use case decreases review time.	8/13/26
Researcher	This is a general use case that involves searching and reviewing content across potential TVA, OIG and public data sources to gather information on topics that will inform decisions and/or actions. Humans conduct final review of AI work and verify sources. This saves time and increases likelihood for broader outreach.	8/13/26
Planner	This general planning use case supports the creation or modification of plans to accomplish work. Humans conduct the final review of AI work. This use case saves time in plan development and execution.	8/13/26
